

DPTF-1251

DPTF-1251 is an excellent vapor barrier & reflective insulation. It consists of 12 μ polyester film / 25 μ aluminum foil / 12 μ polyester film. Used as a facing over insulation board, segments, pipe sections, etc.

Primarily used in cold / cryogenic insulation systems, to prevent the ingress of moisture into the insulation.

DPTF-1251 combines the excellent vapor barrier properties of aluminum with the outstanding mechanical and thermal characteristics of polyester film, giving a ideal, flexible and efficient barrier material, suitable for outdoor use.
